

FOREX QUANT EA

USER MANUAL

Getting Started

Before installing Forex Quant EA on your computer and commencing trading on a real account, please read this carefully: it may be crucial for your future profits. Trading Forex entails risk and each instance of negligence or inattention may lead to significant loss!

1. We strongly recommend that you operate a demo account before trading with real money. This will help you become familiar with the way Forex Quant EA operates before you commit genuine funds to a real money account.
2. Please be exceptionally careful when determining trading volumes and setting automatic risk management parameters!

WHAT YOU MUST KNOW BEFORE USING

Forex Quant EA was developed especially for the EURUSD & GBPUSD currency pairs.

Forex Quant EA is compatible with all Meta Trader 4 brokers, as well as with brokers using ECN-type order fulfilment. You do not need to change any settings.

Forex Quant EA is entirely compatible with NFA-regulated brokers applying No Hedge and FIFO.

Forex Quant EA automatically recognises whether your broker offers four or five- digit quotes. You do not need to change any settings.

We do not recommend that you launch and close your trading terminal too often. Ideally, it ought to work without interruption from market opening on Monday to closure on Friday.

For problem-free operation, use a computer with a minimum configuration: 2 GHz processor, 2 GB RAM, and Windows XP, Windows Vista, Windows 7 or Windows 8 operating system.

Maintaining a stable internet connection is of the essence to ensure reliable Forex Quant EA operation.

The Meta Trader 4 (MT4) Trading Platform

Before getting started it is important that you have an excellent broker that provides the Meta trader 4 platform. As you may or may not know, all brokers are different. Some are more reliable than others, different spreads, data feeds, and such. It is important to pick high quality broker.

We personally have done some tests and have concluded which brokers work well with our software and in general. Thus, we **HIGHLY RECOMMEND** the brokers below this paragraph.

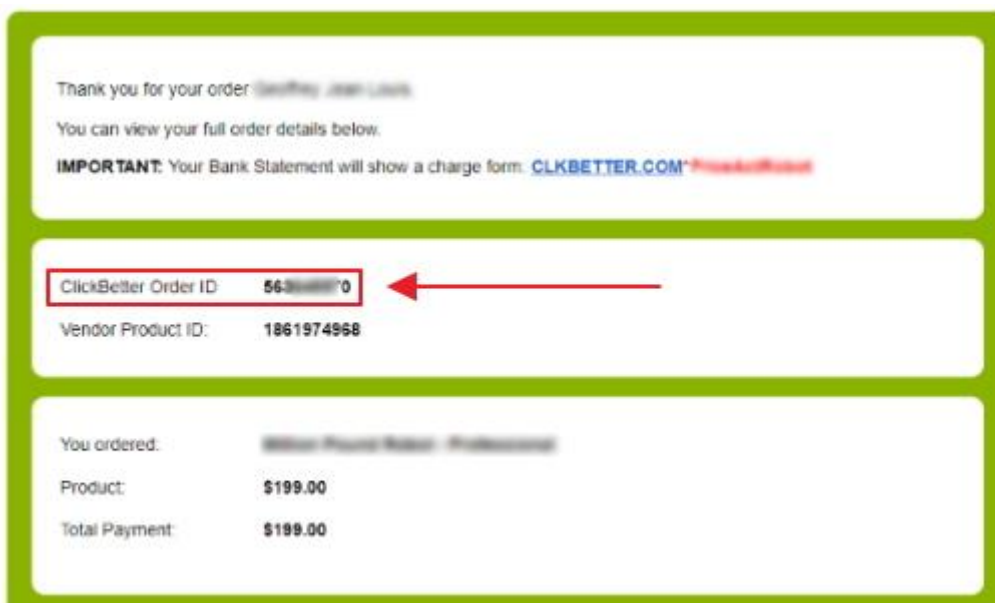

If you do not have MT4 installed on your computer, you can download a free copy by going to one of the following brokers and requesting a demo account:

A dark blue banner with a green square on the left containing the white text 'FBS'. To the right of the square, the text 'CHOOSE A RELIABLE FOREX BROKER' and 'TRADE AND EARN WITH FBS' is written in white. On the far right, there is a green rectangular button with the white text 'OPEN ACCOUNT'. The background of the banner features a faint, stylized candlestick chart with red and green bars and a blue dashed line.

Activate Your Account

Your copy of Forex Quant EA is already activated for real and demo accounts with Clickbetter.com receipt number. The **receipt number is the Click Better Order ID** and you need to copy past when you attach the Forex Quant EA to the MT4 application chart.

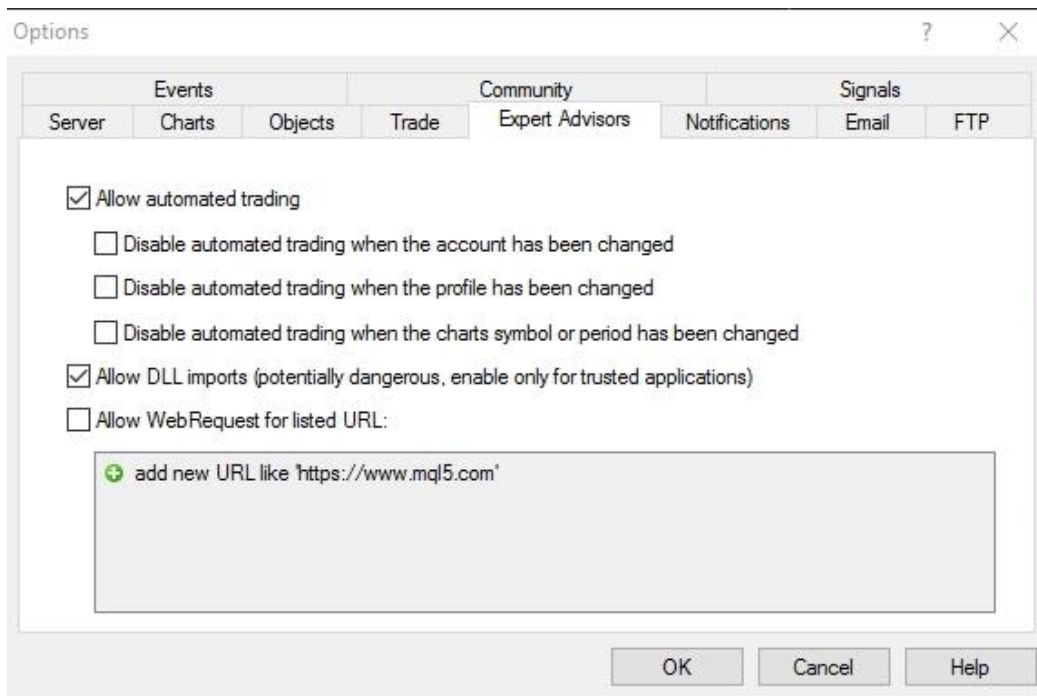

Copy **Click better Order ID** to the authentication box.

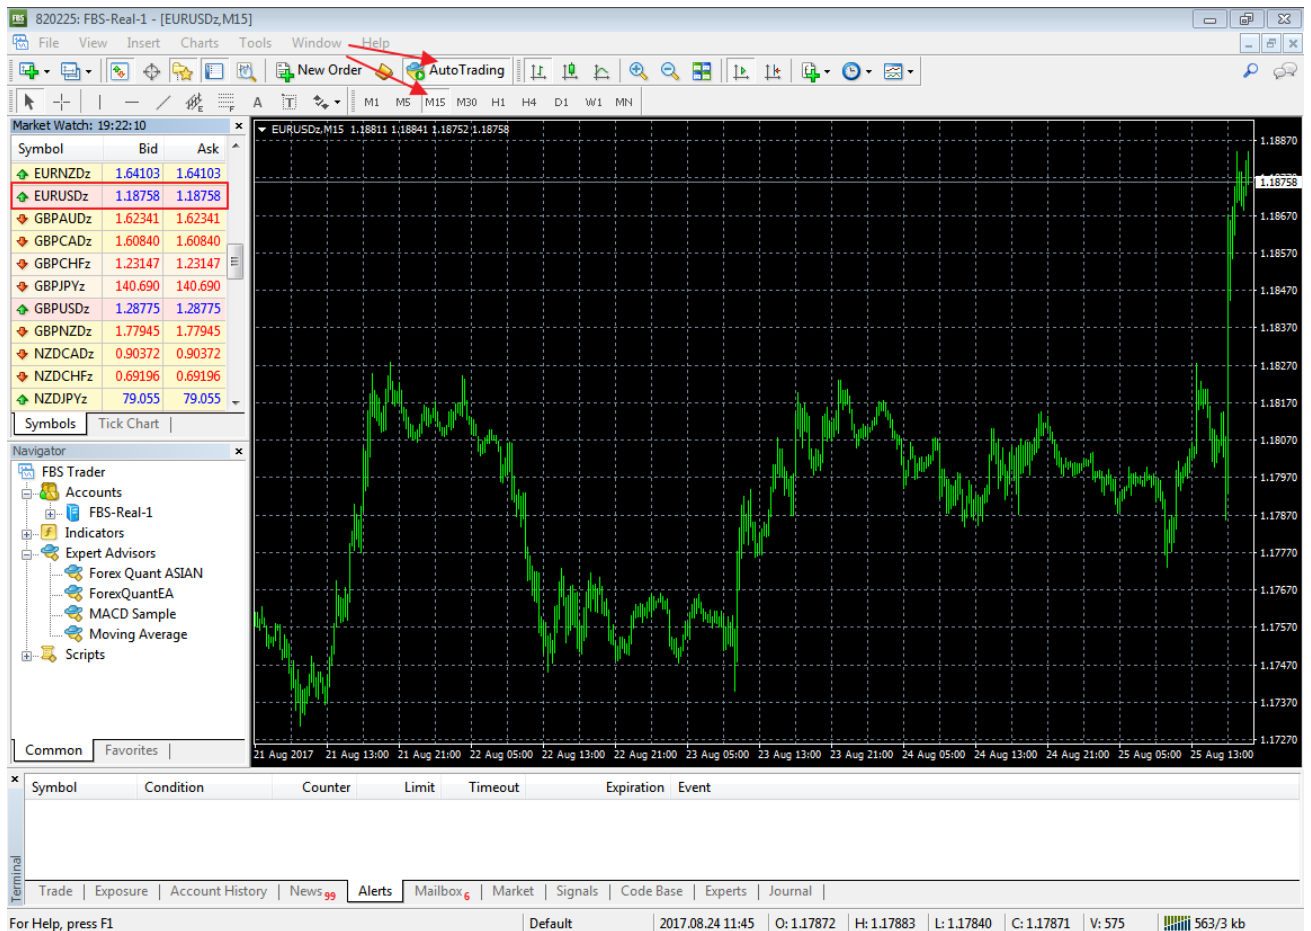

Install Forex Quant EA

The ZIP file contains all necessary files to get started right now. The zip file contains the setup file to install Forex Quant EA.

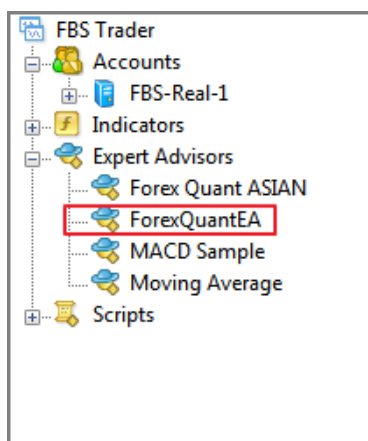

1. Close all Meta Trader 4 (MT4)
2. Run the Forex Quant EA Setup
3. Open MT4 and go to "Tools" and "Options"
4. Click on "Expert Advisors" tab and Make sure that all the settings and alerts are correct before clicking **OK**.

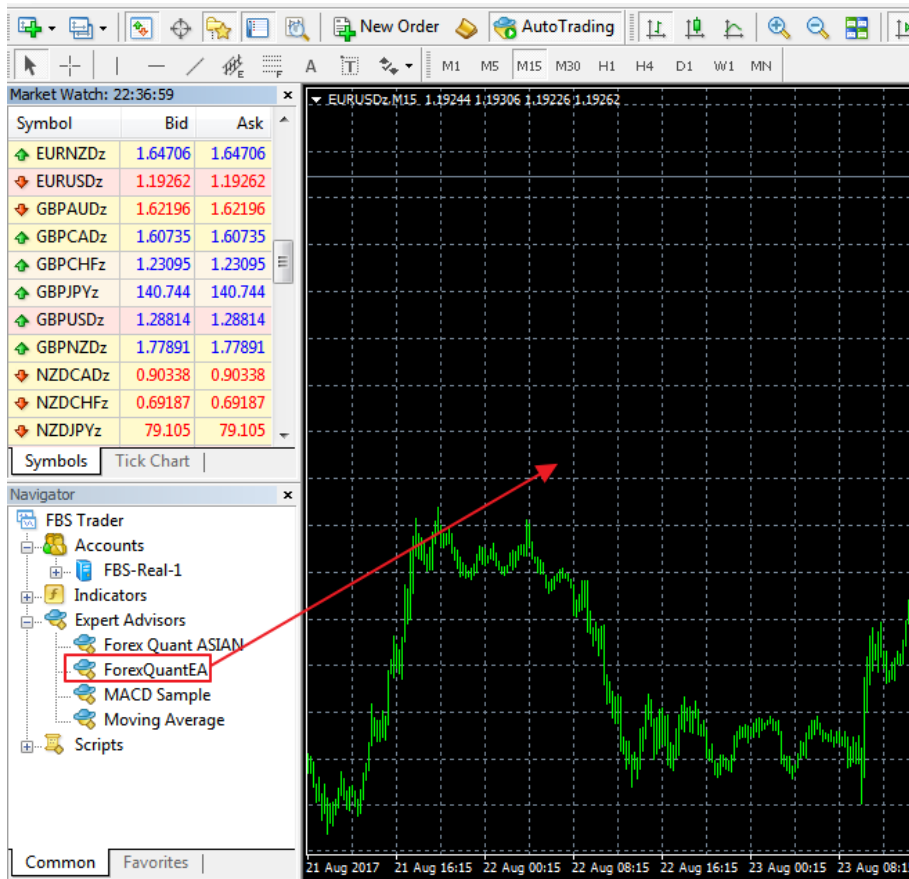

5. Launch your MT4 platform and open EURUSD chart on M15 Time Frame.

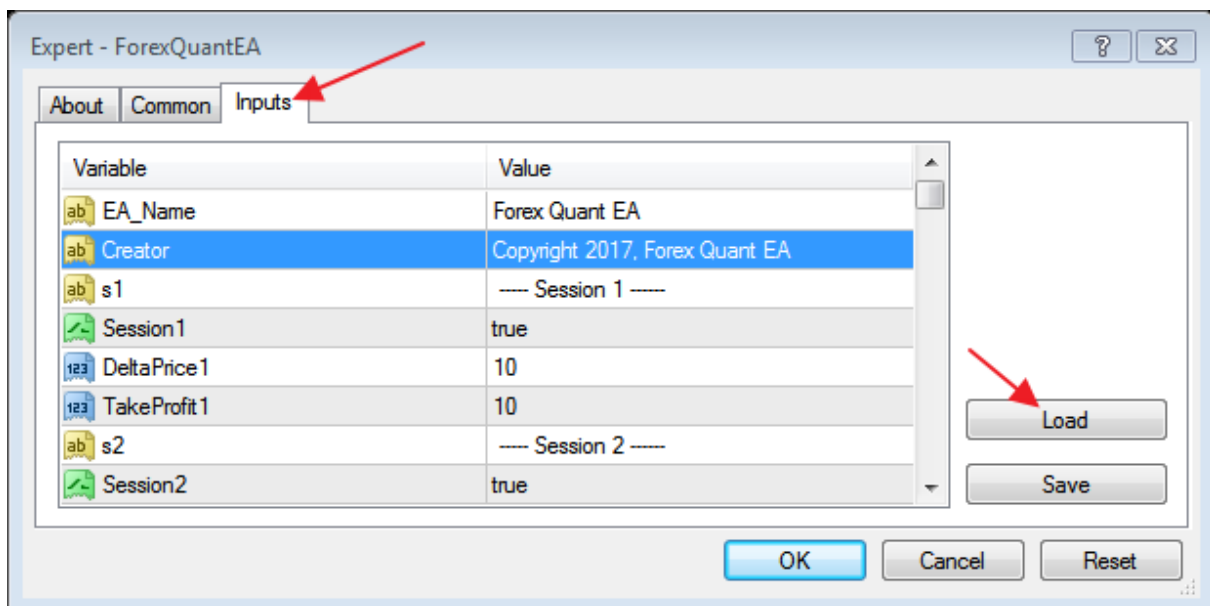

6. Look for the **Expert Advisors** section under the **Navigator** pane at the left side of the platform. Click on the **Plus** sign and the available EAs should be listed there.

7. Click on the EA you want to install and drag it onto one of the charts on your platform.

8. After you drag the EA to chart an option box will open. Select "Inputs" and click on "Load" to select the settings file you want to use.

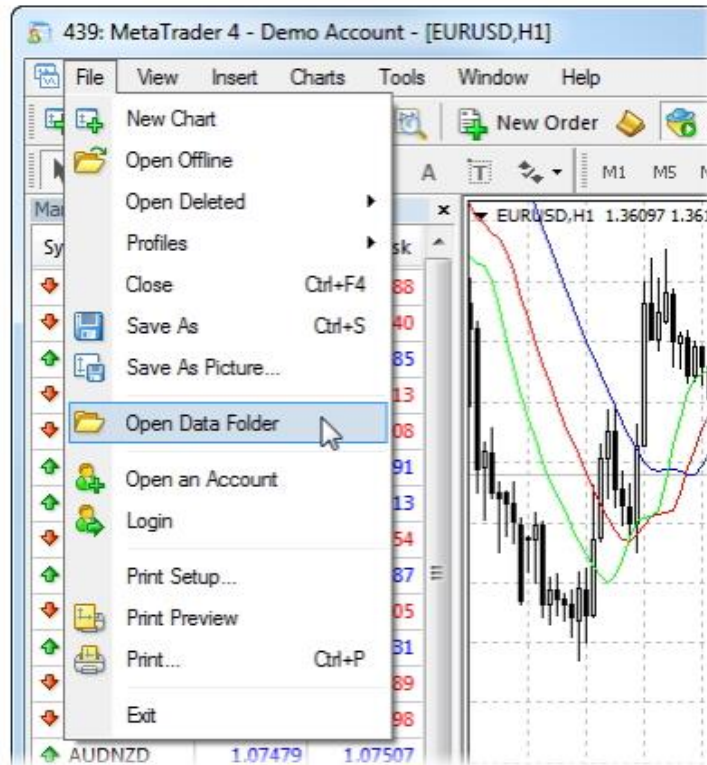

9. After press Load please select "EURUSD.set"

10. All Done! If everything was done correctly you should have a smiley face on the chart. You should repeat from step 5 for GBPUSD currency pair.

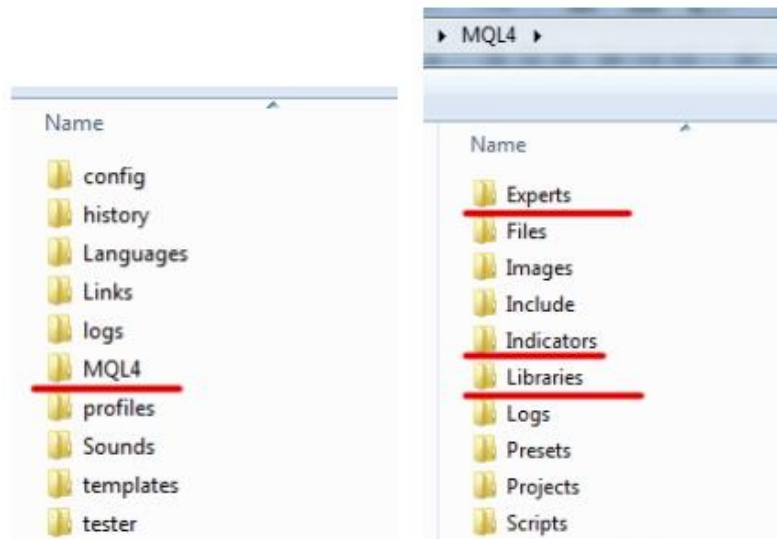

MANUAL INSTALLATION

First you need to locate your Application Data folder of the MT4. To do this, go to the File menu in the MT4 platform and click on "Open Data Folder".

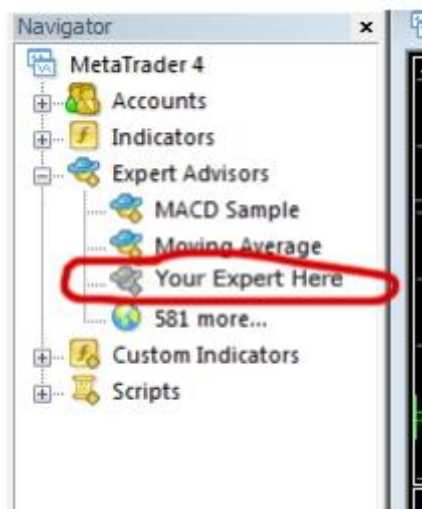

Then open the MQL4 folder, which is in the "Application Data" folder. The next steps are easy:

1. Place your "ForexQuantEA.ex4" file in the "Experts" folder inside the "MQL4" folder.
2. Place your "MQLLock.dll" file in the "Libraries" folder inside the "MQL4" folder.

After you have successfully placed the files in the correct folder, all you need to do is to restart your MT4. If you have done everything correct, the EAs should appear in the "Navigator" Tab of your MT4.

EA SETTINGS

The Forex Quant EA Work with EURUSD & GBPUSD currency pairs on M15 Time Frame. You can use with other pairs at your own risk.

Session – If “True” Enable the session.

TakeProfit – Take profit for session (profit in pips).

GeneralLot – the fixed lot size.
