FX EKSPERT OÜ | Email: fxekspert@gmail.com

Our software trades on the financial markets automatically. The robot opens and closes the trades according to our specific algorithm. Check out strategy tests and trading results: https://fxekspert.eu/results/

Version 3 is optimized for the following currency pairs:

**AUDCAD, AUDCHF, AUDJPY, AUDNZD, AUDUSD, CADCHF, CHFJPY, EURAUD, EURCAD, EURCHF, EURUSD, NZDCAD, NZDCHF, NZDUSD, USDCHF**

Before buying, we recommend testing the software in DEMO account.

For low risk trading use our calculator to calculate a lot size. It is optimized for trading with all supported currency pairs at once.

The robot needs a stable internet connection. Home computer is not suitable. Order a VPS Server.
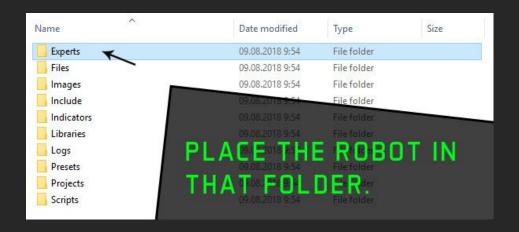

# 1. Account Registration Guide

1. Register your account by clicking here (for international clients) or here (for USA clients).
2. For security reasons, account verification is required. Send the required documents through the broker's environment, to confirm your account and identify yourself.
3. Make a deposit in desired amount. Open "Standard" account. When you open an account, you should choose leverage 1:500 or 1:000, the last one is better.

If you want to use deposit bonuses, be sure to read the terms of bonuses!
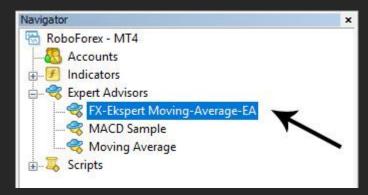

# 2. Robot User Manual

Download Metatrader4 trading software in RoboForex website and install it on your computer. To download the software you need to be logged in. Select „Help" and „Download Metatrader4" from the menu.

Open the software and click **File → Open data folder → MQL4 → Experts** from the top left menu above. Place the robot in that folder

Place the .SET files to **File → Open data folder → MQL4 → Presets** folder.

Restart Metatrader4 software and after that software will appear on the screen.

Press right-click and choose **„Show all"** from **„Market Watch"** window to show all currency pairs.

Press on **„Autotrading"** button. Also click **Tools → Options → Expert Advisors**. „Allow **DLL Imports**" box needs to be checked.

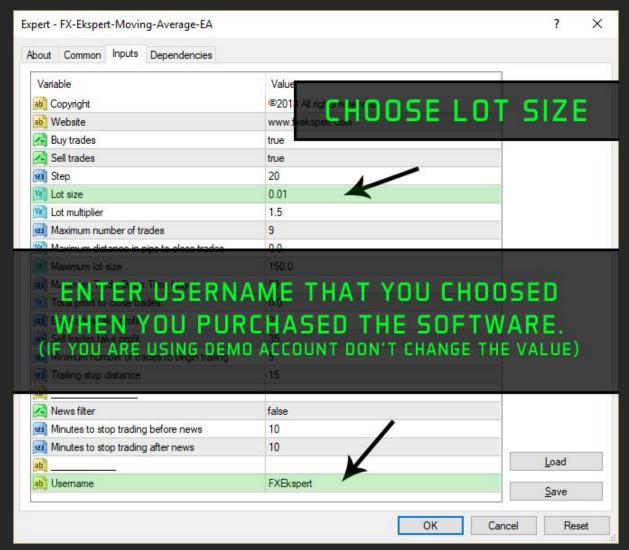

Next, open the desired number of currency pairs from the following list: **AUDCAD, AUDCHF, AUDJPY, AUDNZD, AUDUSD, CADCHF, CHFJPY, EURAUD, EURCAD, EURCHF, EURUSD, NZDCAD, NZDCHF, NZDUSD, USDCHF**

After currency pairs are dragged to the graphs, choose **M30** from the timescale. It is very important.

Drag the robot one at the time to all the graphs. After that, a software settings window will appear. From there, you need to change only **lot size** as desired.

For low risk trading use our calculator to calculate a lot size. It is optimized for trading with all supported currnecy pairs at once.

Press **„Load"** button to upload .SET file with the name of chosen currency pair. The configuration files are in robot folder named „.SET files – version3". You only need choose a lot size manually from software settings.

**All set up!** If you set up everything correctly then you can see smiley face at the top of the graph. Now you just have to wait for the results.
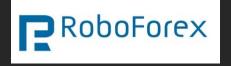

# 3. Our Partners

We chose RoboForex and IC Markets as our partners. The conditions they offer are very good and are suitable for trading with the robot.

**RoboForex** (for international clients) is a member of RFG Holding, which has been operating since 2009. RoboForex is regulated by the IFSC, license IFSC/60/271/TS/17. From the moment of its foundation, RoboForex has always been focused on providing best trading conditions using innovative technologies and many years of experience. RoboForex is an international broker, which offers 8 asset types and more than 8,700 instruments for trading. They are very proud of a variety of services they provide to their clients and partners with, which are of the same quality for all, regardless their experience and amount of their investments.

**IC Markets** (for USA clients) mission is to create the best and most transparent trading environment for retail and institutional clients alike allowing traders to focus more on their trading. Built by traders for traders IC Markets is dedicated to offering superior spreads, execution and service.

IC Markets mission is to provide traders with the lowest spreads possible during all market conditions. They have invested heavily in technology and establishing strong relationships with the largest and most reliable liquidity providers.

# 4. VPS server

Software must run on VPS, so we avoid problems with internet conection. Your computer can be accidentally turned off but of course the software needs to run 24/5 so a VPS is a much safer option.

## Trading VPS Server

**Trading Fx VPS** - has been structured to meet the demands of a dynamic and changing market. They are always expanding and looking into new and innovative technologies to meet the needs of their clients.
