Getting Started with MetaTrader 4

Introduction:

The Volvox Trader runs only on the MetaTrader 4 trading platform. This platform is very popular among traders, and is available for free from a wide variety of forex brokers. If you do not already have MetaTrader 4 installed on your computer, you can download a free practice (or “demo”) account from most forex brokers who offer MetaTrader 4.

We **highly recommend** that you install Volvox Trader on a practice account first – even if you already have a live (or “real”) MetaTrader 4 account. We emphasize that all users should place Volvox Trader on a practice account for time of your comfort in order to familiarize yourselves with the manner in which Volvox Trader trades and performs. After that period of time, if you are satisfied with Robots’s performance and comfortable with how it trades, you may install and run it on a live account. If you do not have a live account, you can open a MetaTrader 4 account at any number of forex brokers.
