Introducing

Dear Trader,

First of all, we would like to thank you very much for your interest in the Everex Elite trading software!

The Everex Elite was developed and improved for 5 years of hard work by a professional Team. It is an ultimate Expert Advisor working with MetaTrader 4. You can’t buy any strategy like this on the internet that is guaranteed. Totally automated program package, easy to install, set up and to run. The autonomous operation is supported with more mathematical algorithms which are adapting to the current Forex conditions in every single tick. With our individual User interface you can get all of the information while the strategy is working hard for You! As a result you can see that the Everex Elite is an excellent high-end Expert Advisor which absolute safe is and grants you high profit. After the installation and the setting up is ready, the program will run 100% automated and makes profit while you deal with something else! Please keep on reading this User’s Guide to get all of the useful information how to install and use Everex Elite Expert Advisor!

Best regards,

Team Everex

https://www.everexfx.com/
System description

The Everex Elite is 100% individual, its logic was developed by our team and nowhere else is accessible. The strategy is totally up to date and contains the latest development. The working principal of this strategy is based on market resistance levels.

During the years we have successfully developed a continuously adaptive StopLoss system. To reach this, statistics were analyzed in depth, which were generated with the help of different mathematical softwares.

Another scientific approach was the searching and analyzing of mathematical connections in the dynamics of forex market data, based on different new generation mathematical researches (Neural Networks, Reinforcement Learning, Support Vector Machines etc.).

Everex Elite’s trades are generally only 30 seconds but during this time our above mentioned intelligent Stoploss system analyses, evaluates and reacts all market movements. Thanks to that we can modify the StopLoss value 20-30 times during this short time. Due to these facts Everex Elite is continuously profitable in the last 6 years!

General recommendations

Minimum system requirements:

- 1.5 GHz
- 1 GB RAM
- 1 GB free disk space
- Windows Vista/7/8 Windows Server 2008 or higher
- Broad band internet connection

Recommended system requirement:

- 2 GHz or higher processor
- at least 2 GB RAM
- 1 GB free disk space
- Windows Vista/7/8 Windows Server 2008 or higher
- Broad band internet connection

Broker Requirements:

- Suggested StopLevel 0, Maximum 2 PIP
- Account with low spread and with commission fee (like ECN account)
- MetaTrader 4 platform
- 5 digits price feed

NOTE: StopLevel 0 means, that you can place your StopLoss as close as you want to the actual market price.

Check our Partners page on our website to see some Brokers which meet the requirements. We introduce only those brokers with we have experience and perform well.
The Expert Advisor installation

First you have to open your MetaTrader 4 build 600 or higher on which you would like to run Everex Elite. Then go to *File* and click on *Open Data Folder*, as you can see below.
Now you have to go to the MQL4 folder.

In MQL4 folder go to Experts folder and copy Everex _Elite_EURUSD.ex4 and Everex_Elite_GBPUSD.ex4 in it.
In MQL4 folder go to Libraries folder and copy Everex _Elite_EURUSD.dll and Everex_Elite_GBPUSD.dll in it.

If you have any trouble please contact us support@everexfx.com. Please keep reading this guide to learn how to run Everex Elite in MetaTrader 4!
Attaching Everex Elite Expert Advisor to the Chart

First you have to add your MetaTrader 4 account number to your member’s area at https://www.everexfx.com/?page_id=345. Follow the steps as you can see below.

**NOTE: If you do not register/add your account number, Everex Elite will not be able to run.**

Follow these instructions:

Fill out *Account number 1* field, with your MetaTrader 4 account number, then click to *Save Changes*.

![Account Numbers](image)

After this you will see the following screen. Next to the *Account number 1* field you can see your Serial number which belongs to your active MetaTrader4 account number. Later you have to use this number. (See in section *Variables.*

![Success](image)
Start the MetaTrader 4 platform where you copied Everex Elite EA. Go to the “Symbols” window, right click and choose “Show all” option.
Then you should right click on EURUSD and GBPUSD symbols and create a new H1 chart window.

**NOTE:** The symbol code for Euro US Dollar is EURUSD and for Great-Britain Pound US dollar is GBPUSD can be different in some platform where the symbol code contains some kind of extension (Example: EURUSD.mini ; EURUSD.Pro). It does not affect our program’s running.
Go to “Navigator” window Expert Advisors and double click on Everex_Elite_EURUSD while the EURUSD chart is active.
A new window with the expert properties will pop-up. Click at the “Common” tab and check these properties as you can see below.

Click at the “Inputs” tab. At this tab you can set up the variables of Everex Elite. Below you can read an explanation about these variables.
Variables

**Serial Number** – This unique number was generated in the *Member’s Area* section on our website. You have to copy that number into the *value* field. (Double-click in to *value* field and paste the serial number from the Member’s Area)

*NOTE: If you are misspell the Serial Number several times, our Anti-hack protection system will recognize this as threat, and the user will be banned permanently.*

**MagicNumber** – This variable stands for the identification of the orders and trades. You can set any value here but if you are running multiple EAs please be aware that do not give the same Magic Number to more EAs.

**Lots** – This is the fix value of lots which Everex Elite will trade on each and every trade. (In case when you set *UseMoneyManagement* to false)

**UseMoneyManagement** – If it is false then *Lots* variable is active. If it’s true, then Everex Elite will use its own money management system.

**Risk_Long** – You can set the Risk with this variable on long trades.

- Very low: between 0-0,2
- Low: between 0,2-0,4
- Medium: between 0,4-0,6
- High: between 0,6-0,8
- Extremely high: between 0,8-1

**Risk_Short** – You can set the Risk with this variable on short trades. (Values are defined above.)
**MaxLot** – You can set the maximal tradable lot size with this variable.

NOTE: With this license the maximum lot size is 7. If you want to trade more than 7 lot please contact us: info@everexfx.com

**BalanceRisk** – You can set the possible maximum Drawdown with this variable. For example if you set BalanceRisk to 0.2 then after losing the 20% of your balance, Everex Elite will stop trading until you restart it. In order to restart, just remove Everex Elite from the chart and attach it again as specified above.

NOTE: Be aware of that if the broker cannot close your position at the set StopLoss it may cause a larger drawdown. (See how to remove Everex Elite from the chart in section Removing Everex Elite Expert Advisor from the chart)

**MaxSpread** – You can set the maximum spread value with this variable in PIP. If the spread is higher then this value, Everex Elite will stop trading until the spread goes back to normal.

After you set up the variables please click on “ok” and Everex Elite is ready to run! As you can see, after a few seconds our dedicated user interface will show up on the chart. With the help of this you can see some information regarding your Everex Elite professional trading software.

To attach Everex_Elite_GBPUSD, please open a new H1 GBPUSD chart window and follow the same process as defined by EURUSD.

NOTE: On the same symbol you are allowed to run Everex Elite only once.

NOTE: After attaching Everex Elite DO NOT close MetaTrader 4 because the EA running will stop.
Removing Everex Elite Expert Advisor from the Chart

Right Click on the chart then go to Expert Advisors then click to Remove.
Performance examples with various settings

EURUSD

For 2 years with Medium Risk (Risk=0.5):

GBPUSD

For 2 years with Medium Risk (Risk=0,5):

For detailed view check [this page].

For 2 years with High Risk (Risk=0,75):

For detailed view check [this page].
Program Features

Self-analyzing / Self restarting system

If there is a connection or any communication problem between the broker and the MetaTrader Everex Elite detects it and restarts. This is an automated program feature, you should not do anything.

Everex Elite will not trade for a minute if the broker did not supply data for 120 seconds, or if there is an extreme market movement (such as 180 point gap or more than 700 point / minute).

High Spread Protection

Widening spreads during certain periods is one of the most popular tricks and can cost us, traders, a lot of money. Everex Elite monitors the spread continuously and in case the spread goes above the allowed maximum value it disables trading temporarily until the spread goes back to normal. As the result you never need to be worry that Everex Elite places a trade when the spread is unacceptably high.

Adaptive Stoploss system

Adaptive Stoploss system is a unique and very powerful feature. Depending on the market conditions the Everex Elite adapts stops levels automatically. It ensures stops are placed as close as possible without being too close. The benefit for the trader is that profits are as high as possible while it decreases drawdowns to the lowest possible minimum.

Built in money management

Managing risk exposure smart is essential for every successful trader. That's why the Everex Elite comes with built-in money management. It manages risk and trade size according to your setup and available balance.

Built in margin call protection

If you are running also another EAs, Everex Elite automatically checks the margin before placing orders to avoid margin call.

Built in maximal drawdown protection

You can set the possible maximum Drawdown with BalanceRisk. For example if you set BalanceRisk to 0.15 then after losing the 15% of your balance, Everex Elite will stop trading until you restart it.

NOTE: Be aware of that if the broker cannot close your position at the set StopLoss it may cause a larger drawdown.
Graphical user interface (GUI)

Our program has a built-in graphical user interface, which can help you follow the program running and status.

You can see a picture of the GUI below.

Here you can see the program status and warnings. You can see the status/warning texts below.

Here you can see some important information about the program as your Risk settings, Lot sizes, Actual spread, and the money management.

Here you can see important news. For example, high impact news like NFP.

Here you can check that your current version of Everex Elite is up to date.

Here you can see our Contact info.

*NOTE: During backtest our GUI is not working.*
ATTENTION!

**Anti-hack protection**

Our software contains more self-monitoring systems. If any of these detect the possibility of hacking, it will automatically inform us. After three attempts, the system will ban the user permanently.

**Keep safe your account number**

Do not give your account number to third parties. Because if there will be any attempt to hack our system with your account number, you will be banned permanently.
**Backtest**

If you would like to make a backtest with our strategy make sure that Visual mode is active.

With money management you will be able to make backtest with the following main base account currencies: EUR, GBP, USD, AUD, JPY, CHF.
