

# FOREXIMBA

## FOLLOW THE NEXT STEPS TO INSTALL AND SET FOREXIMBA

1. Open MQL4 folder of your MetaTrader4 (File – Open Data Folder – MQL4).
2. Copy the ex4 file from the archive to a folder Experts, dll file to a folder Libraries).
3. Reboot MetaTrader4.
4. Move FOREXIMBA from Navigator to a chart AUDUSD with a timeframe M30.
5. Allow DLL imports and live trading in Common options.
6. Leave Inputs parameters as default or set the desired parameters.
7. Turn ON AutoTrading button, if needed.
8. Check if you set everything properly:

## PARAMETERS OF FOREXIMBA

### AutoGMT

The EA automatically finds a GMT of your broker

### ManualGMT

Allows to set a GMT of your broker manually

### Session\_1, Session\_2, Session\_3

Turning ON/OFF sessions, which open orders. Sessions have different TakeProfit, StopLoss and time of opening orders

### SessionRisk

Allows to set a part of your deposit in percentage, which the EA will use in trading for each session. **Notice!** FOREXIMBA chooses lot based on this parameter. If you set there 0 (zero), the EA will choose lot based on the next parameters: **Lot\_1, Lot\_2, Lot\_3**

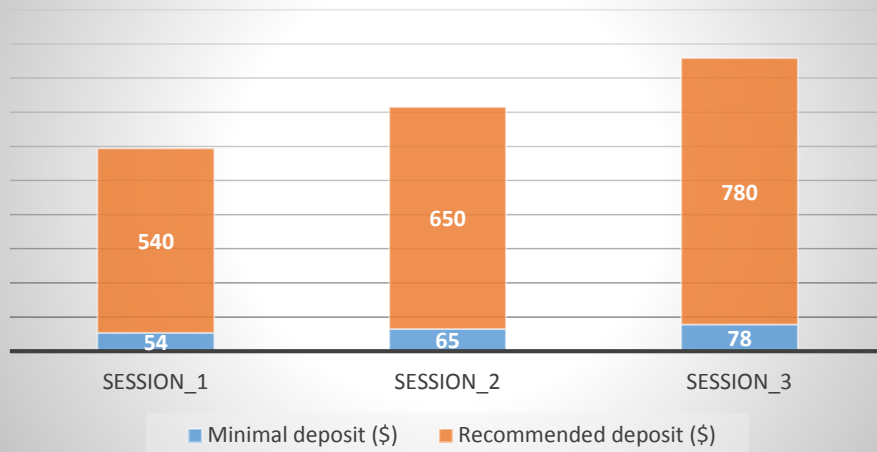

### RecoveryMode

With this mode (true) next order after a loss, will try to cover that loss. Without this mode (false), all orders will have the same TakeProfit, StopLoss and lot as a first order

### AccMiniLot

Use this parameter only if your account type has a mini lot, where normal 0.01 lot is 0.001 and 0.1 lot is 0.01

### Required deposits for lot 0.01

### Required deposits for lot 0.1

*Notice!* If your deposit is minimal, you need to set 100 in a **SessionRisk** parameter

**WE RECOMMEND TO TRADE ON AUDUSD CURRENCY PAIR, USING ONLY ONE SESSION WITH 10% SESSIONRISK. YOUR LEVERAGE SHOULD BE HIGHER THAN 1:50 (BIGGER LEVERAGE IS BETTER FOR RELIABILITY).**

**IT IS NECESSARY FOR A STRATEGY OF THE EA TO WORK ONLINE 24/7.**

**DO NOT TRY TO USE CRACKED VERSION OF FOREXIMBA IN ORDER TO AVOID UNPREDICTABLE RESULTS.**
